

3.5, Electrical insulation tape

Fiberglass Tape / Electrical Insulation Tape

Fiberglass (or glass fibre) woven tapes are fabricated from high quality type E fiberglass that will not burn and will withstand continuous exposure to temperatures of **1,000°F / 538°C**, and it features excellent electrical insulation.

Based on diversities in appearance and processing properties, they can be divided into five categories: plain weave, twill weave, satin weave, herringbone weave, broken twill weave.

It is mainly applied to wrap motors, transformers, communication cables, and other electrical equipment. And it is also a substrate for FRP products and glassteel.

Thickness: 0.08mm-0.40mm

Width: 10mm-200mm
