

16.5 Jacketed Graphite Packing

Jacketed Graphite Packing braided from graphite yarns with metal alloy and glass fiber casing like the socks outside. Used in any steam valves applications.

Typical Application

>It is the ideal choice for high pressure, high temperature steam valves service.

Prime Features

>Highest pressure, and temperature

>Good thermal and chemical resistance and high elasticity.

Technical Data

Material		100% Expanded Graphite Yarn and Metal Socks
Temperature Range		-200 up to +555℃ atmosphere; -200 up to +850℃ in Steam
Process	Valves	55 Mpa
PH		0~14
Density		1.75 g/cm ³
